Portfolio

PROFILE

Full Stack Developer focused on e-commerce, integrations, and building maintainable web systems. I have experience developing end-to-end applications with JavaScript, HTML, CSS, React, Next.js, TypeScript, and Node.js, integrating REST APIs, JWT authentication, relational databases, and purchase flows with Mercado Pago. I am interested in building solutions that reduce operational friction, connect services, and improve the user experience in digital and commercial environments.

EDUCATION

• I.E.N. (Instituto Educativo Económico Nacional)

2023 - 2025 (Completed)

Software Development Technician  – GPA: 8.50/10

Resistencia, Chaco

EXPERIENCE

• Subsecretaría de Contenidos Audiovisuales

August 2024 - November 2024

Intern in Robotics, Chatbots, and Artificial Intelligence

Corrientes, Argentina

- Programmed microcontrollers in Arduino IDE, implementing event-driven conditional logic for interaction with physical sensors.
- Integrated sensors and actuators into functional prototypes, developing control routines and validating system behavior.
- Performed hardware/software testing and debugging in collaboration with a multidisciplinary technical team.

PROJECTS

• EntrenAR: End-to-end e-commerce web platform for supplements and sportswear

JavaScript, HTML, CSS, Next.js, React, TypeScript, TailwindCSS, PostgreSQL, Prisma, JWT, and Mercado Pago

- Developed an end-to-end e-commerce platform with frontend, backend, database, authentication, user roles, and an architecture prepared to scale commercial features.
- Built the purchase flow with product catalog, category filtering, cart, checkout, favorites, user profile, and payment integration with Mercado Pago.
- Implemented REST APIs, JWT authentication, a data model with PostgreSQL and Prisma, and a structure prepared for an admin panel.
- Designed responsive interfaces focused on conversion, catalog clarity, visual consistency, and reducing friction in the shopping experience.

• GymPoint: Mobile fitness application for routine management and workout tracking

React Native, Node.js, MySQL, Sequelize, and Docker

- Designed and developed a hybrid mobile application with a client-server architecture using React Native and Node.js.
- Implemented an authentication system with JWT access and refresh tokens, and role-based authorization: free, premium, and admin.
- Built a REST API with 27 endpoints using Node.js and Sequelize to manage users, GPS-based attendance validation, routines, rewards, and physical progress persisted in MySQL.
- Deployed the backend and database using Docker on a VPS, generating an Android APK connected to the deployed environment.

SKILLS

- **Languages:** JavaScript, TypeScript
- **Frontend:** HTML5, CSS3, React, Next.js, React Native, TailwindCSS, responsive UX/UI
- **Backend:** Node.js, Express, REST APIs, Webhooks, JWT authentication
- **E-commerce and Integrations:** Tiendanube, Mercado Pago, Mercado Libre, checkout, payments, logistics, frontend-backend integration
- **Databases:** PostgreSQL, MySQL, Prisma, Sequelize
- **DevOps and Tools:** Git, GitHub, Docker, Postman, VPS, Jira, Trello
- **Languages:** Spanish (Native), English (B2 Level – Intermediate)
